Professional Summary

I am a dedicated and results-driven **Software Engineer** with hands-on experience in backend development, mobile app development, and software engineering principles. With a strong foundation in **Java**, **Spring Boot**, **ASP.NET**, and **Flutter**, I excel at building scalable and efficient solutions. Throughout my academic journey at **Adventist University of Central Africa**, I developed expertise in full-stack development, collaborating on various projects to enhance both my technical and problem-solving skills. Passionate about learning new technologies, I am committed to delivering high-quality software solutions and continuously improving my skills in a fast-paced environment.

Employment History

Software Engineer Student, Adventist University Of Central Africa, Kigali city, Rwanda

Jan. 2022 - Dec. 2024
