

Dear Bittwork Team,

I'm excited to apply for the Full-Stack Developer Intern position in Kigali. As a developer with a passion, I'm eager to work on projects that make a difference in solving African real-world issues.

I've worked on building responsive web applications using newer frameworks like React and Node.js. I enjoy writing clean, efficient code and have built full-stack projects that use APIs and databases to deliver real functionality.

Bittwork's mission to build technology with purpose closely resonates with my personal aspirations. I would be delighted to learn from your team and contribute to building solutions that empower African businesses.

Thank you for taking the time to consider my application I look forward to the prospect of developing with Bittwork.

Sincerely,

KABANO Festo
